EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

Claim 4, line 7, before "drain", insert --the--.

Claim 7, line 10, before "drain", insert --the--; and

line 9, replace "where in" with --wherein the--.

Claim 8, line 11, replace "where in" with --wherein the--.

Claim 10, line 10, before "drain", insert --the--; and

line 12, before "drain", insert --the--.

2. The following is an examiner's statement of reasons for allowance:

Claims 1-10 recite a system for reducing power in memory cells and a method for manufacturing a circuit for reducing power in memory cells.

The prior art does not teach or suggest the following limitations:

" wherein the input is connected to a wordline of the memory cells;

wherein the output is connected to a positive voltage supply node of the memory cells;

wherein a first voltage applied to the output is reduced by at least one V_t from a supply voltage, VDD, when the wordline is inactive;

wherein a second voltage applied to the output is near the supply voltage, VDD, when the wordline is active.”;

“ wherein the input of the inverter is connected to a wordline of the memory cells;

wherein the output of the inverter is connected to the gate of the PFET;

wherein the source of the PFET, the gate of the NFET, and drain of the NFET are connected to the supply voltage, VDD;

wherein the drain of the PFET and the source of the NFET are connected to a positive voltage supply node of the memory cells.”;

“ wherein the gate of the first NFET is connected to the wordline of the memory cells;

wherein the drain and the source of the first NFET is connected to the source of the second NFET and to the gate of the third NFET;

wherein the drain of the second NFET, the gate of the second NFET, the drain of the third NFET, the drain of the fourth NFET, and the gate of the fourth NFET are connected to the supply voltage, VDD;

wherein the source of the third NFET, and the source of the fourth NFET are connected to a positive voltage supply node of the memory cells.”;

and

“ wherein the input of the inverter is connected to an active low wordline;

wherein the output of the inverter is connected to a local wordline of the memory cells;

wherein the source of the PFET, the gate of the NFET, and the drain of the NFET are connected to the supply voltage, VDD;

wherein the drain of the PFET and the source of the NFET are connected to a positive voltage supply node of the memory cells."

Therefore, the application is in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
